 - Experience working in different tools JIRA,Trello,Figma, Instrument etc.
 - Knowledge of Core Data, Core Location, ARKit, CoreML , Firebase , Dart.
-

EXPERIENCE

HEAD OF MOBILE ENGINEERING (PRESENT)

AI Solutions Lead | Delivery + Engineering | CTO-Founder | moboxy.com | Ahmedabad

JUN - 2024 TO PRESENT

With over a decade of hands-on experience, I build high-quality mobile applications across iOS, Android, and Flutter platforms. I combine strong technical expertise with **leadership, ensuring scalable architecture, clean code, and successful project delivery aligned** with business goals.

I also specialize in **AI integration and development, implementing LLMs**, generative AI, and intelligent automation to create smart, data-driven user experiences. Proficient in JIRA, Git, and Bitbucket, I'm passionate about delivering robust, AI-powered mobile ecosystems.

MOBILE APPLICATION DEV | AUTOMATION (2 YRS , 7 Mos)

Phyllo | Bangalore (Remotely)

DEC - 2021 TO JUN - 2024

- Specifically, I have been working on creating **SDKs for iOS, Android, Flutter, and React Native**. This multifaceted role has allowed me to leverage and expand my expertise in mobile development, ensuring seamless integration and functionality across all four platforms.
- Phyllo offers a **Unified API** that allows businesses and developers to access verified, creator-consented data directly from platforms like YouTube, Instagram, TikTok, Twitch, Shopify, and Upwork. Instead of a developer building separate integrations for every social media platform, they use Phyllo's single pipeline.
- **Creator Tools:** Powering analytics dashboards or media kits for influencers.
- **Web3 & Gaming:** Verifying digital identities and cross-platform activity.

SR IOS APP DEVELOPER (1 yrs , 5 Mos)

ORIENT SOFTWARE AUS PVT LTD | Ahmedabad

DEC - 2017 TO APR - 2019

- **Architected a robust iOS application** using **Swift** and **MVVM architecture**, ensuring a clean separation of concerns and high code maintainability for future feature scaling.
- Implemented a **real-time data layer using Firebase/Firestore** to handle instant order synchronization between customers and the merchant dashboard, reducing order latency.
- **More focused on UI/UX** with pixels perfect for great user experience.
- Real-time tracking for in-house delivery drivers to improve efficiency and customer transparency.
- A modern, cloud-based POS system that runs on multiple devices (Apple, Android, Windows) to manage orders, payments, and table management.

MID IOS APP DEVELOPER (1 YR , 4 Mos)

Innovify | Ahmedabad

Sep - 016 TO Dec - 2017

- Started Swift language development
- Worked with Objective - C
- Made base development with Xamarin cross platform
- Payment gateways : Apple In-App Purchase , Stripe

EDUCATION

BACHELOR OF ENGINEERING, MINOR IN INFORMATION TECHNOLOGY

GEC , Bhavnagar , Gujarat - India

JUNE 2012

- GPA 8.5/10
-

SKILLS

- Mobile Application Development
 - iOS - Swift , Swift UI , Objective - C
 - Architecture design
 - Flutter - Dart
 - React Native
 - AI / Generative AI
-

PROJECTS

1 - NEXT ORDER DRIVER APP

- Next Order: Driver helps stores better track their drivers and always keep their customers updated with real-time driver tracking.
- Simply add in each delivery, start the order and have the customer instantly track their order right to the door! Know exactly as the driver is driving back to the store and when to put in the next order into the oven.
- This app constantly uses your GPS to update the store/customer of your location, which can decrease your phones' battery life. Make sure you keep an in-car charger handy for happy delivery
- More : <https://nextorder.com.au/>
- URL : <https://apps.apple.com/ie/app/next-order-driver/id1473512106>
- Made With : Swift ,Payment Gateway, Google Cloud - FireStore

2 - TWOPLUGS

- The smart way to buy and sell a service without having to worry if you can afford it or not. The idea is to get you to keep more of your pay-check/money in your pocket and only spend time doing what you love. Works simple
- Made With : Swift , Stripe ,Live Chat
- URL : <https://apps.apple.com/us/app/twoplugs/id1257831625?ls=1>

3 - ONLINE ORDERING SYSTEM -(RESTAURANT)

- Tracking from store to door:- Keep your customers engaged by tracking their orders in real-time. POS systems .
Table Bookings: Accept commission-free table reservations and get valuable customer feedback about their experience
- Made With : Swift ,Payment Gateway, Google Cloud - FireStore

4 - ADIB AUTOBCM

- It helps enterprises to meet crucial Business Continuity Management objectives with efficiency and consistency. It enables companies to effectively plan and manage their continuity and crisis management processes.
 - Ascent AutoBCM© software is highly configurable to business continuity needs of various organizations. It can easily analyse the impact of business continuity risks, create and test business continuity plans, initiate and manage disaster recovery activities.
 - More : <https://www.autoresilience.com/>
-

-
- URL : <https://apps.apple.com/us/app/id1494689791>
 - Made With : Swift , IOS Graph , Document Made with Excel.

5 - EYESY

- Exchange of information in real time.
- How Eyesy work
- You look for the place on the map, you select your questions about the place and you send the information request. It's easy to use and fast!
- The users closest to the place receive real-time notification of your request and answer your questions with a photo and an associated comment.
- If their response matches your request, including that the photo is relevant, you accept it and it will automatically add to the corresponding library instead. Any community will thus benefit from this approved information, for any research on this place.
- If you want to contribute
- You receive a notification in real time concerning a request for information on the place where you are or its surroundings, you respond to this request with a photo and a simple comment.
- The more you contribute, the more people you have responding to you!
- Sharing and transparency is our motto.
- URL : <https://apps.apple.com/in/app/eyesy/id1440369006>
- Made With : Swift , Location Request , Firebase , Pro User manage.
